

The training was an important personal and professional experience for the participants. Challenges, difficulties and solutions, resolutions were found along with professional inspiration, methodology development and connections.

“The training I received through the program was no doubt world class. Key-concepts which have shaped me include: goal-setting, creating a written and visual vision, inner tranquility and peace, public speaking, mental empowerment, and many more. I feel very comfortable with this „horizontal“ and non-directive artistic style, which focuses on collaboration and partnership rather than competition. I implement this not only in my work but relations with others. I have also enjoyed the support, encouragement, and friendships I have made along the way, which have been so instrumental to my personal growth, including the opportunity to create a better Universe around us. As I reflect upon what the training for The Hidden Artist means to me, from a broad perspective, the program shaped, refined, and defined who I am as a Human Being (Creator/demiurge). The process of learning through research for me was complicated, but creative. We all need a conscious action such as stepping out of our current reality for a few days of reflection; looking at where we are in life, our past decisions which brought us to this point; where we want to go in the future and what we need to do to get us there. This is the value of a personal retreat inside the group.”
